

# Worksite inspection

The worksite checklist presented here is intended as a guide and inspiration. It includes useful examples of things to look for during your worksite inspection. You should adapt the checklist to the situations you typically encounter as well as to the requirements of laws and regulations in your area. Safety first – always!

So, walk around the site and look for potential obstructions and hazards. Complete the checklist and take notes. *If the answer is yes, decide on how it impacts your work plan – but only if you feel confident that the work can be performed safely.*
